

Chem 124 Spring 2012 Course Information/Syllabus

Instructor: Dr. Kristi Kincaid (DBH 242; kincaid@rice.edu)

Office hours: Email for appointment

Classroom coordinator: Naomi Duval (DBH 243, nduval@rice.edu)

Course Philosophy and Aims:

This course is part of a two semester sequence designed to enhance the material from the general chemistry lecture course and prepare you to enter a scientific research environment. A main focus of the curriculum this semester is how to use data collected in lab to draw conclusions about the subject of inquiry. This second semester course will also involve more laboratory skills than the first semester. The skills (both mental and physical) that you will learn in these courses are applicable to any scientific discipline that you may pursue.

Location and time:

There are seven different sections that meet each week. Each section will follow a 2-week sequence, with the lab performed the first week, and a discussion of data analysis taking place in the second week. Sections are staggered so that there will be two concurrent sections (one in lab and one in discussion) running most weeks. **ODD** numbered sections will start the first week, and **EVEN** numbered sections will start the third week (lab is cancelled the second week due to MLK holiday). See schedule below for details:

Week	Dates	Odd Numbered Sections	Even numbered sections
1	Jan 9-11	Lab 1	NO CLASS
2	Jan 16-18	NO CLASS	NO CLASS
3	Jan 23-25	Discussion 1	Lab 1
4	Jan 30-Feb 1	Lab 2	Discussion 1
5	Feb 6-8	Discussion 2	Lab 2
6	Feb 13-15	Lab 3	Discussion 2
7	Feb 20-22	Discussion 3	Lab 3
8	Feb 27-29	SPRING BREAK	SPRING BREAK
9	Mar 5-7	Lab 4	Discussion 3
10	Mar 12-14	Discussion 4	Lab 4
11	Mar 19-21	Lab 5	Discussion 4
12	Mar 26-28	Discussion 5	Lab 5
13	Apr 2-4	Lab 6	Discussion 5
14	Apr 9-11	Discussion 6	Lab 6
15	Apr 16-18	NO CLASS	Discussion 6

During Lab weeks, students will meet in room 214 DBH for a brief pre-lab lecture before moving to room 200. Discussion groups will meet in room 210 DBH. During your first lab meeting, you will be assigned to one of 3 discussion groups for your section.

Course Requirements:

Attendance is mandatory for **every** lab and **every** discussion session (see grading section for details). Punctuality is also mandatory; points will be deducted from your grade for tardiness. Extremely late students (>15 minutes) may not be admitted to lab.

At the beginning of the semester, you will need to sign a form on OwlSpace <https://owlspace-ccm.rice.edu/portal> (*under tests & quizzes*) that you have read and agree to abide by the lab safety rules. You are required to wear closed-toe shoes, safety glasses (provided in lab), and a lab coat (available for purchase¹) when working in room 200.

Lab Reports:

The lab procedures and reports will be posted on OwlSpace. Prior to lab, you will need to download and read the experiment for the week (including any background reading), and print out the lab procedure and report form. You will also need to complete a pre-lab assignment prior to coming to lab. You should come to lab prepared to discuss the lab in-depth and be able to make predictions about any outcomes.

During lab, you will record your data on the report form, which you can also use for your final report. The specific format and requirements for the report will be indicated in the individual labs. Sometimes it will be appropriate to attach additional pages to your report, such as a data tables or a graph. Preliminary analysis of your data will be due to your discussion TA at the beginning of discussion the following week. A final lab report will be due to your lab TA at the beginning of your next lab section (2 weeks after data collection).

Honor policy: Lab reports fall under the scope of Rice's honor code. Collaboration is an important part of the scientific process, and you will be discussing the lab with your partner, TAs, and other classmates. However, you must complete your own report, including all calculations and conclusions; and remember that copying is not the same as collaborating.

Grading:

Each lab will be worth 50 points. These points will be divided between the lab report (40 points, including the pre-lab assignment), and participation points from your discussion section (10pts). Points can (and will!) also be added or deducted to your lab report based on lab citizenship (see above). Points will be deducted for tardiness to class. Late reports will be

¹ The Chemistry Graduate Student Association (CGSA) sells lab coats for \$20 (cash or check only, NO CREDIT CARDS); times and location for purchase will be announced in class.

docked points for each day late (5pts/day). Reports will not be accepted more than one week late.

At the end of the semester, your lowest score will be dropped, and your total lab points will be added to your points from Chem 122 (750 possible) to give your final letter grade for both courses (out of a total of 1000 points).

Completion of every lab is mandatory for this course. Although you will be able to drop your lowest lab report, you are required to complete each one. If you receive zero points on a report due to an unexcused absence, you will not be able to drop that score. If you fail to contact Dr. Kincaid and make arrangements for a missed lab or discussion, your combined grade for Chem122/124 will be automatically lowered by a third of a letter grade (e.g. A- to B+). This is in addition to the points lost by not completing the lab report.

Regrading:

If you think you were graded incorrectly, you may submit your report for a regrade. Please keep in mind that it is worth neither your nor my time to regrade a lab report for 1 or 2 points, and unless the error is one of simple miscalculation of the total points, it is unlikely that your request will be successful. **Submit all regrade requests to Naomi Duval**; do NOT submit a regrade request to your TA. You have 3 days after a lab is returned to you to submit a regrade request. To ensure proper record keeping do NOT write on your original lab report; instead, submit a separate sheet of paper with your reasons for requesting a regrade.

Missed labs:

It is your responsibility to contact Dr. Kincaid when you miss a lab. For approved university commitments, contact Dr. Kincaid at least one week in advance of your absence so that you can reschedule to attend a different section that same week. For unscheduled absences, such as severe illness, contact Dr. Kincaid prior to lab, once you realize you will not be able to attend, and arrangements can be made to make up the lab. If you are in a true emergency, do not worry about contacting us right away, just get to the hospital while there is still a chance they can reattach your arm.

In the event of making up a lab, your lab report will be due at the beginning of your next regularly scheduled lab.

Lab Citizenship:

Anyone who pursues a career in the sciences will work within a group of other researchers in one way or another (unless you are extremely rich and extremely eccentric). Because of this, it is important to learn how to be a good lab citizen. Good lab citizenship generally can be summed up by the golden rule: treat others as you would like to be treated. Specifically, some key components are:

- **Respect** for others in conversation and space use
- **Tidiness** in common use areas
- **Conscientious** use of shared reagents
- **Openness** to scientific discussion with labmates
- Leaving your work area in a **clean** and **safe** state

Safety:

Lab safety is taken very seriously at Rice. As mentioned above, closed-toe shoes, safety glasses, and lab coats are required when we are in room 200. Even if you feel that you aren't doing anything dangerous, it is important to always follow safety rules in the lab. This is because lab safety procedures are designed to protect you not only from your own actions, but also from those around you and those that have been in the lab before you. You may be clean and careful, but the person next to you may not be, or the person who used the bench prior to you may have left an acid spill there.

Cubbies are provided to store your bags and backpacks; they are not to be placed on the floor or on the bench.

There will be **absolutely no eating or drinking** allowed in the lab. Period. It is also highly recommended that you wash your hands upon leaving the lab.

Phones: phones, ipods, etc. are to be silenced or turned off, and left in your bag.

Students under 18:

Your parents or legal guardian are required to sign a "Release and Hold Harmless Agreement" before you can work in the lab. Download this form from [OwlSpace](#) and turn in a signed paper copy to Naomi Duval. Your parent may also fax this form to 713-348-3479.

If you already completed this form for Chem 123, you do not need to do so a second time.

Special Needs:

Any student with a disability requiring accommodations in this class is encouraged to contact the instructor during the first two weeks of class. All discussions will remain confidential. Students should also contact the Disabled Student Services Office in the Ley Student Center.
